SUMMARY

B2B marketing and content professional with 6+ years across AI, SaaS, fintech, BFSI, payments, and enterprise technology. Plans campaigns and turns technical products into clear web, search, email, LinkedIn, case-study, and sales content for business and technical buyers. Hands-on experience with generative AI workflows, SEO/GEO/AEO, paid search, outbound, CRM tracking, analytics, landing-page optimization, and editorial governance

EXPERIENCE

LexiConn Content Services Pvt Ltd

Role: Content Associate · Acting Team Lead & Content Strategist – Mumbai (Remote), India

Mar 2023 – Sep 2026

- Planned and produced multi-channel B2B programs across SEO, landing pages, email, LinkedIn, case studies, reports, product pages, sales collateral, and executive content for SaaS, AI, fintech, payments, and enterprise-technology accounts.
- Ran a six-month demand-generation program for an AI customer-experience SaaS product within a \$5,000 monthly budget, combining Google Search, SEO content, landing-page optimization, and outbound. Used GA4, Google Tag Manager, Microsoft Clarity, HubSpot, Apollo, and LinkedIn Sales Navigator to track traffic, demos, and opportunities.
- Built and ran an outbound program targeting 200+ pre-seed and Series A founders across India, the US, the UK, and Australia. Used Apollo, Firecrawl, Claude, Hunter.io, Skylead, LinkedIn, and email to qualify accounts and personalize outreach, helping convert two startups into paying clients by months three to four.
- Conducted keyword research, content audits, search-intent mapping, competitor analysis, and SEO/GEO/AEO optimization. Banking and insurance initiatives contributed to roughly 2x organic traffic growth; a Worldline developer guide earned Google AI Overview visibility, and a Marezi landing page ranked first for its target query.
- Built Auditor Pro with Qwen 3.5 through Ollama to check drafts against briefs and source documents before human approval. Adoption by 19 team members reduced revision rounds by approximately 40-50%; reusable prompts and review standards supported accurate, on-brand AI-assisted work.
- Produced 15-20 SEO articles and 5+ long-form assets per month across concurrent accounts, including technical explainers, case studies, whitepapers, web copy, product content, and email campaigns.
- Created pitch decks, solution overviews, one-pagers, product copy, case studies, and thought-leadership assets; worked with design, development, product-facing, sales, and client teams from brief through handoff.
- Served as Acting Team Lead from Feb to Aug 2025, coordinating 3 writers and 1 designer across

briefs, reviews, deadlines, quality checks, and client delivery.

Matrix Tech Solutions Pvt Ltd

Role: Content Writer & UI/UX Copywriter – Kolkata, India

Sep 2019 – Jan 2022

- Produced whitepapers, eBooks, case studies, web copy, product pages, and marketing content for software and SaaS clients in the US, the UK, and the Middle East, translating technical material for business audiences.
- Created website and product content for Jupiter Money, Keka HR, and Paperflite, including interface copy, onboarding content, customer journeys, and client-facing communications.
- Managed concurrent B2B technology assignments while maintaining brand voice, editorial accuracy, and delivery timelines.
