PROFESSIONAL SUMMARY

AI-native B2B content and operations professional with 6+ years across fintech, BFSI, and SaaS, moving deliberately from execution into content systems and product-facing work. Designed and shipped an AI content QC workflow adopted by 19 team members (40–50% fewer revision rounds), supported editorial operations as acting team lead, and contributed to GTM content and distribution for Card2Connect and the LexiConn AI/Auditor Pro suite. Targeting associate–mid roles in content strategy, product marketing support, and content/marketing ops where strong team mentorship meets genuine ownership of content systems and AI-assisted workflows.

CORE COMPETENCIES

Content Strategy & Editorial Planning · Content Operations & Workflow Design · Product Marketing Support (GTM Content, Enablement) · Audience Segmentation & Buyer Education · GEO / AEO / SEO-Aware Structuring · AI-Assisted Editorial QA & Content Automation · Cross-Functional Collaboration · Analytics & Process Improvement

PROFESSIONAL EXPERIENCE

LexiConn Content Services Pvt Ltd

Mar 2022 – Present

Content Associate · Acting Team Lead, Feb – Aug 2025 · Remote

AI Workflow & Content QC

- Designed and implemented an AI-powered content QC workflow (local Ollama, Qwen 3.5 4B) adopted by 19 team members, reducing revision rounds by 40–50% across BFSI and SaaS accounts.
- Designed prompt systems and context engineering frameworks for LLM-based content review; integrated AI tooling into daily editorial QA and brief review cycles across client accounts.

Editorial Operations & Team Lead

- Acted as team lead for a 4-person editorial pod — owned brief-to-delivery workflows, status tracking, and coordination with account managers and compliance reviewers across concurrent accounts.
- Established contributor guidelines, editorial quality standards, and review cadence; maintained delivery timelines with no disruption during the leadership transition period.

LexiConn AI / Auditor Pro

- Contributed editorial workflows and quality criteria that fed into Auditor Pro, LexiConn's AI content QC product — helping translate internal processes into a commercial offering within the LexiConn AI automation suite.

GTM & Product-Facing Content

- Supported GTM content for LexiConn AI's four-product suite: UX microcopy, landing pages, FAQ and objection-handling content, and long-form explainers for technical and non-technical buyers.
- Produced pitch decks and solution overviews for enterprise tech and fintech clients — aligned to GTM and business development objectives.

Content Execution — HDFC · FutureGenerali · Micron India · Hexaware · Kantar · Taggd

- Delivered website copy, whitepapers, enterprise communications, and Figma-based microcopy across regulated and technical industries — contributing to 2× web traffic growth for banking and insurance clients and 30% improvement in employee engagement for enterprise comms accounts.
- Produced research-led whitepapers and industry reports for Kantar and Taggd (2,000–4,700 words per piece) across investor education and financial behaviour verticals.
- Applied GEO and AEO principles to improve content structure and discoverability across AI-powered search surfaces and featured snippets.

Matrix Tech Solutions Pvt Ltd

Sep 2019 – Jan 2022

Content Writer & UI/UX Copywriter · Kolkata

- Produced long-form and UX content for fintech, SaaS, and HR tech clients — websites, whitepapers, case studies, and product copy for Jupiter Money, Keka HR, and Paperflite — maintaining consistent voice across concurrent accounts.
- Supported content calendars and review cycles across multiple accounts under short SLAs, building volume capacity and delivery reliability.

SELECTED PROJECTS

AI Content QC Workflow — *Ollama · Qwen 3.5 4B · Node.js · React · Express*

- AI-powered editorial QC system standardising content checks across client accounts; adopted by 19 writers and editors with 40–50% reduction in revision rounds. Architectural foundation for LexiConn Auditor Pro.
github.com/TitashSinha/AI-QC-tool

Content Pipeline Tracker — *React · Node.js · PostgreSQL · Prisma · Vercel*

- Assignment-to-delivery visibility tool with role-based workflows, status tracking, and bottleneck analysis for a live content team.
github.com/TitashSinha/content-pipeline-tracker

Card2Connect – GTM Content Support — *LexiConn AI*

- Contributed content and distribution support for an AI-powered networking product: segmented buyer content across three audience types, objection-handling documents, and inputs to a channel-mapped distribution strategy oriented around a single conversion metric.

LexiConn AI / Auditor Pro – Workflow Input — *LexiConn AI*

- Provided editorial workflow design and quality criteria that informed how LexiConn’s internal QC process was productised into Auditor Pro — demonstrating early systems thinking and productization exposure.

n8n Job Discovery Agent — *n8n · Serper API · Notion · Gmail*

- Automation flow consolidating job leads, deduplication, AI fit scoring, and Gmail alerts — demonstrates comfort with marketing and ops-style automation pipelines.

Hermes News Agent — *Python · API Integration*

- Autonomous agent for ingesting and summarising news via APIs; signals familiarity with agents and information workflows.
